

## **CENTRAL ARMREST DISPLAY DEVICE**

### **ABSTRACT**

A central armrest display device includes a body in the central armrest that  
5 has a housing compartment with an opening directing rearwards to house and  
anchor a case. The display device may be erected on the case for viewing or  
housed in the case. The case can hold a multimedia player. Passengers on the  
rear seat of a car can see multimedia programs on the display device mounting  
on the central armrest.
